

# Make Your Mark As Part Of A Winning Team!

## Warehouse Operative

Marks Electrical Limited are a Leicester based retailer, with a turnover of over £30m annually. Specialising in home entertainment and domestic appliances, delivering to happy customers, nationally for over 30 years.

### The Role – It's all about efficient service.

As one of our hard-working warehouse operatives, you will be responsible for either unloading lorry loads of appliances for our 200,000 sqft warehousing facility or picking from our vast array of over 2,500 products for customer orders which we deliver next day across the country.

Whether it's a new Washing Machine for the Mr & Mrs Bee and their four children in Skegness, or a new Juicer for Mark, the bodybuilder in Daventry, we are looking for Warehouse Operatives with the drive to succeed and keen eye for detail when picking orders for this family run business.

A good knowledge of Tetris would be helpful as maintaining the tidiness of the stock and general warehouse is a key attribute required when working for us. Good time management and organisation skills are also a must.

Making sure you and we are fully compliant with all Health and Safety protocols, service standards, rules, procedures and regulations. All these things enable us to operate as efficiently as possible, and give the highest level of customer service and satisfaction we can.

We work on two patterns of an early shift and late shift, so whether you like being up with the birds chirping through your window, or watching the foxes play while you're on the way home we have the shift for you. The requirement to work one in three weekends shouldn't affect your social life too much, but the hours are reduced, so you'll still be home for Antiques Roadshow.

### About You

You should have an existing Counterbalance Fork Lift Truck Licence and be able to look good in a High Vis Jacket and Steel Toe Capped Boots. Be fit and healthy as there's a bit of heavy lifting to do!

The personal qualities you bring to the role will be every bit as important as your skills and attitude. Friendly and approachable, diligent with a good attention to detail. Being a team player is also a key requirement of this role.

If you think you have the necessary skills and experience then email your CV with a covering letter to [personnel@markselectrical.co.uk](mailto:personnel@markselectrical.co.uk) explaining why you think you're suitable for the role.
